

MailWasher

For years now our team have all used and recommended Mailwasher to help cut down email spam as well as provide a quick means to preview email on our accounts without actually having to download them - really helpful for quick online registration or when waiting to see if someone has responded to an email yet. It is small, does not take up much of your PC resources and can hide out of the way on your right quick-launch task bar. Here's the scoop: Benefitso Manage e-mail for greater productivityo Regain control of your e-mail inboxo Put an end to unwanted e-mail contento Save time and reduce down –timeo Fight back against spammersProduct Informationo View e-mail on the server before it gets to your computero Delete e-mail or bounce spam back to sendero Friends and blacklist supporto Inbuilt fuzzy logic to detect spamo Access to a global community database – FirstAlert!
